## INTRODUCTION

The OP3FT is a non-profit organization acting in the public interest. Its purpose is to hold, promote, protect and ensure the progress of the Frogans technology in the form of an open standard for the Internet, available to all, free of charge.

The Frogans technology enables the implementation, on the Internet, of a new software layer, called the Frogans layer, alongside other existing software layers such as E-mail or the Web. The Frogans layer enables the publishing, on the Internet, of a new type of site, called Frogans Sites.

A Frogans Address is a string of characters used to identify a Frogans Site published on the Internet or in an intranet. The string of characters of a Frogans Address can contain international characters and can be written from left to right, or from right to left, depending on the writing system and the language.

In the writing direction, the string of characters of a Frogans Address begins with a Network Name, followed by the asterisk character "\*" and ends with a Site Name. For example, in the case of the left-to-right writing direction, the pattern of a Frogans Address is:

Network-Name\*Site-Name

A Frogans Network is a group of Frogans Addresses that have the same Network Name. Frogans Addresses and the Frogans Networks are registered in a core database, called the Frogans Core Registry or FCR. The technical and commercial operation of this database, which belongs to the OP3FT, is delegated to an entity putting itself at the service of Internet users, in a manner comparable to registry operators for domain names on the Internet. This entity is called the FCR Operator.

A Frogans Address or a Frogans Network is registered and managed in the FCR through the intermediary of a person who has opened an administrator account in the FCR. This party is called an FCR Account Administrator.

By drawing on practices applied in the case of domain name registries, the OP3FT has elaborated and adopted this document in order to define the terms corresponding to Network Names and Site Names whose registration in the FCR is reserved or whose usage is reserved, as well as the beneficiaries of these reserved terms.

Each reserved term that is defined in this document is associated with a linguistic category. The ten linguistic categories that are currently available are defined in the FACR (Frogans Address Composition Rules) technical specification, elaborated and published by the OP3FT. A linguistic category corresponds either to a group of languages using the same writing system, or to a language using one or more writing systems.

The reserved terms defined in this document are also provided in a separate file in CSV format in order to enable their implementation in computer systems.

This document and the file in CSV format are published on the Web site of the FCR Operator at the following permanent URL: <https://fcr.frogans/en/resources/reserved-terms/access.html>.

This document is the second revision of the document published on November 29, 2013. The modifications mainly cover:

- update of the list of Network Names reserved for countries following the update of the ISO 3166-1 standard (part 1),
- addition of the name of the projected local branch of the OP3FT in China (section 4.a),
- minor changes to wording.

The official version of this document is provided in the English language. Translations in other languages can also be provided by the OP3FT for information purposes.

The beneficiary of a reserved term in this document can register this term in the FCR, doing so under the conditions given in the Frogans Technology User Policy, published on the official Web site of the Frogans technology at the following permanent URL: <https://www.frogans.org/en/resources/ftup/access.html>

The beneficiary of a reserved term can also register terms other than the reserved term, to be used with or instead of the reserved term, doing so under the normal conditions given in the Frogans Technology User Policy. Whenever the beneficiary of a reserved term decides to register a term other than the reserved term, he or she does not waive the benefits of the reserved term.

In this document, the following conventions apply:

- the beneficiary of a reserved term is indicated after the reserved term, between the [ and ] characters;
- the linguistic category is indicated under the reserved term between the < and > characters; the Unicode characters that compose this term are indicated, separated by commas, between the { and } characters, after the linguistic category;
- regarding the linguistic categories LC-Latin, LC-Cyrillic and LC-Greek, the reserved term is provided in uppercase; the same term in lower case is covered by the reservation, as well as the other terms that are identical according to the IFAP (International Frogans Address Pattern) technical specification, elaborated and published by the OP3FT;
- additional information about the meaning of the reserved term can be indicated after the reserved term and before its beneficiary, between the ( and ) characters.

The content of the file in CSV format respects the following specifications:

- the file uses the character set of the Unicode Standard 7.0.0; the file is encoded in UTF-8 in compliance with RFC 3629 of the IETF; the file starts with a Byte Order Mark (U+FEFF ZERO WIDTH NO-BREAK SPACE character); each line of the file ends with the Line Feed character (U+000A LINE FEED character);
- the file contains data relative to each reserved term; this data is structured into the following fields:
  - Field 1: SECTION; section corresponding to the reserved term, as per the table of contents of this document; the possible values of the field are: c1 (part 1), c2a, c2b, c2c, c2d (sections 2.a to 2.d of part 2), c3 (part 3), c4a, c4b, c4c, c4d, c4e, c4f (sections 4.a to 4.f of part 4), c5a, c5b (sections 5.a and 5.b of part 5), c6a, c6b, c6c (sections 6.a to 6.c of part 6), and c7 (part 7);
  - Field 2: SCOPE; scope of the reserved term; the possible values of the field are: NetworkName (the term is reserved as a Network Name), SiteName (the term is reserved as a Site Name) and BothNames (the term is reserved as a Network Name and as a Site Name);

- Field 3: CATEGORY; linguistic category of the reserved term; the possible values of the field are currently: LC-Latin, LC-Chinese, LC-Japanese, LC-Korean, LC-Arabic, LC-Cyrillic, LC-Hebrew, LC-Devanagari, LC-Thai and LC-Greek;
- Field 4: TERM; string of characters corresponding to the reserved term;
- Field 5: INFO; additional information about the meaning of the reserved term; the value of the field is empty if no additional information is given;
- Field 6: BENEFICIARY; name of the beneficiary of the reserved term; the value of the field is empty when there is no beneficiary concerned (categories c5a, c5b, c6a, c6b and c6c);
- the first line of the file contains the name, in uppercase, of the six fields, separated by a semicolon (U+003B SEMICOLON character);
- each following line of the file contains the values of the fields corresponding to a reserved term, separated by a semicolon (U+003B SEMICOLON character).

The contents of this document can be modified. In the case of modifications, only the version in force of the document shall prevail. The version in force is indicated on the Web site of the FCR Operator at the following permanent URL: <https://fcr.frogans/en/resources/reserved-terms/access.html>.

This document consists of seven parts, as follows: Network Names reserved for countries (part 1), Network Names reserved for international organizations (part 2), Network Names reserved for organizations participating in the development of the Internet (part 3), Network Names and Site Names reserved for the OP3FT (part 4), Restricted Network Names and Site Names (part 5), Unauthorized Network Names and Site Names (part 6), Network Names and Site Names which have been the subject of a court decision (part 7).

## 1. NETWORK NAMES RESERVED FOR COUNTRIES

This part covers terms reserved for countries as Network Names.

Registration of each term of this part is reserved for the corresponding country or for its approved representative.

For each country, these terms are:

- The two-letter code officially assigned to the country by the ISO 3166-1 alpha 2 standard; this code corresponds to the country code top-level domain (ccTLD) used in the Domain Name System (DNS) on the Internet;
- the name of the country in the English language in its short version as it is assigned by the ISO 3166-1 standard; if a name appears twice in the ISO 3166-1 standard or if it contains too many characters to be registered as a Network Name, the name of the country in the English language as defined in the "Scripts, Languages and Territories" list published by the Unicode Consortium in the context of the CLDR project (<http://cldr.unicode.org/>) is used if the number of characters permits this;
- the name(s) of the country in each of its official or commonly used languages as defined in the "Scripts, Languages and Territories" list published by the Unicode Consortium in the context of the CLDR project; the country names in languages that do not correspond to the linguistic categories that are currently available cannot technically be registered as Network Names and, therefore, do

not appear in the list below; the list of terms reserved for countries will be updated as the Frogans technology evolves.

In the terms defined below, parentheses (U+0028 and U+0029 characters), square brackets (U+005B and U+005D characters) as well as the characters which they contain are eliminated. In addition, in order for these country names to be registered as Network Names:

- full stops (U+002E character) and asterisks (U+002A character) are eliminated;
- joiner characters, unique or combined, are replaced by a hyphen (U+002D character); these joiner characters are commas (U+002C character), hyphens (U+002D character), spaces (U+0020 character), apostrophes (U+0027 character) and ampersands (U+0026 character).

The terms also include the two-letter codes AC, SU and UK that are exceptionally reserved in the ISO 3166-1 standard.

The terms are classified by beneficiary country, according to the order of the ISO 3166-1 standard. The name of the beneficiary country, indicated between the [ and ] characters, corresponds to the country name in the English language, in its long version as it is assigned by the ISO 3166-1 standard.

## **2.c. INTERGOVERNMENTAL ORGANIZATIONS WITH THE STATUS OF OBSERVER AT THE UN**

The following list contains the terms corresponding to intergovernmental organizations with the status of observer at the UN General Assembly, whether or not they maintain a permanent office at the UN Headquarters.

These organizations are amongst the organizations eligible to register a domain name in the .int gTLD.

The terms of the following list correspond to short names reserved by ICANN as part of the program to create new gTLDs (decision of July 17, 2013), with the exception of:

- the short name of African Union Organization (AU) which has already been reserved for Australia in part 1 of this document and is replaced by the term AFRICANUNION;
- the short name of the Georgia, Ukraine, Azerbaijan and Moldova Organization for Democracy and Economic Development (GUAM) which has already been reserved as a country name in part 1 of this document and is replaced by the term GUAM-ORGANIZATION.

If an organization does not have a short name of this nature, the term used corresponds to the personalized part of the domain name of the official Web site of the organization. Thus, the terms reserved for the organizations Central European Initiative and the Global Fund to Fight AIDS, Tuberculosis and Malaria are respectively CEI and THEGLOBALFUND.

## 4. NETWORK NAMES AND SITE NAMES RESERVED FOR THE OP3FT

This part covers terms reserved for the OP3FT as Network Names or as Site Names.

Registration of these terms is reserved for the OP3FT because they correspond to terms that are specific to the Frogans technology.

This part groups lists of terms corresponding to the OP3FT name (section 4.a), technical specifications (section 4.b), software (section 4.c), policies (4.d), Frogans Core Registry (section 4.e) and other terms (section 4.f).

## 4.a. THE OP3FT NAME

The following terms correspond to the OP3FT name and to the names of the local branches of the OP3FT.

- OP3FT (Organization for the Promotion, Protection and Progress of Frogans Technology) [OP3FT]  
<LC-Latin> {U+004F, U+0050, U+0033, U+0046, U+0054}
- OP3FT 中国 (Organization for the Promotion, Protection and Progress of Frogans Technology in China) [OP3FT]  
<LC-Chinese> {U+004F, U+0050, U+0033, U+0046, U+0054, U+4E2D, U+56FD}

## 4.b. TECHNICAL SPECIFICATIONS

The following list contains terms corresponding to technical specifications elaborated by the OP3FT.

- UPIL (Uniform Portable Interface Language) [OP3FT]  
<LC-Latin> {U+0055, U+0050, U+0049, U+004C}
- IFAP (International Frogans Address Pattern) [OP3FT]  
<LC-Latin> {U+0049, U+0046, U+0041, U+0050}
- FACR (Frogans Address Composition Rules) [OP3FT]  
<LC-Latin> {U+0046, U+0041, U+0043, U+0052}
- UCSR (Uniform Content Server Request) [OP3FT]  
<LC-Latin> {U+0055, U+0043, U+0053, U+0052}
- UDSM (Uniform Digital Signature Mechanism) [OP3FT]  
<LC-Latin> {U+0055, U+0044, U+0053, U+004D}
- FPUL (Frogans Player Update Language) [OP3FT]  
<LC-Latin> {U+0046, U+0050, U+0055, U+004C}
- FNSL (Frogans Network System Language) [OP3FT]  
<LC-Latin> {U+0046, U+004E, U+0053, U+004C}
- FSDL (Frogans Slide Description Language) [OP3FT]  
<LC-Latin> {U+0046, U+0053, U+0044, U+004C}
- FCR-MSI (Frogans Core Registry Multi-Stakeholder Interface) [OP3FT]  
<LC-Latin> {U+0046, U+0043, U+0052, U+0041, U+0050, U+0049}
- LTFP (Leap to Frogans Process) [OP3FT]  
<LC-Latin> {U+004C, U+0054, U+0046, U+0050}

## 4.c. SOFTWARE

The following list contains terms corresponding to software developed by the OP3FT.

- FPXDE (Frogans Player X-platform Development Environment) [OP3FT]  
<LC-Latin> {U+0046, U+0050, U+0058, U+0044, U+0045}
- FROGANSPLAYER [OP3FT]  
<LC-Latin> {U+0046, U+0052, U+004F, U+0047, U+0041, U+004E, U+0053, U+0050, U+004C, U+0041, U+0059, U+0045, U+0052}
- FROGANS-PLAYER [OP3FT]  
<LC-Latin> {U+0046, U+0052, U+004F, U+0047, U+0041, U+004E, U+0053, U+002D, U+0050, U+004C, U+0041, U+0059, U+0045, U+0052}

## 4.d. POLICIES

The following list contains terms corresponding to policies elaborated by the OP3FT.

- FTUP (Frogans Technology User Policy) [OP3FT]  
<LC-Latin> {U+0046, U+0054, U+0055, U+0050}
- UDRP-F (Uniform Dispute Resolution Policy for Frogans Addresses) [OP3FT]  
<LC-Latin> {U+0055, U+0044, U+0052, U+0050, U+002D, U+0046}
- FTDCP (Frogans Technology Development Contributor Policy) [OP3FT]  
<LC-Latin> {U+0046, U+0054, U+0044, U+0043, U+0050}

## 4.e. FROGANS CORE REGISTRY

The following list contains terms corresponding to the Frogans Core Registry.

- FCR (Frogans Core Registry) [OP3FT]  
<LC-Latin> {U+0046, U+0043, U+0052}
- FCROPERATOR (Frogans Core Registry Operator) [OP3FT]  
<LC-Latin> {U+0046, U+0043, U+0052, U+004F, U+0050, U+0045, U+0052, U+0041, U+0054, U+004F, U+0052}
- FCR-OPERATOR (Frogans Core Registry Operator) [OP3FT]  
<LC-Latin> {U+0046, U+0043, U+0052, U+002D, U+004F, U+0050, U+0045, U+0052, U+0041, U+0054, U+004F, U+0052}

## 5. RESTRICTED NETWORK NAMES AND SITE NAMES

This part covers the terms whose usage is restricted as Network Names or as Site Names.

Usage of these terms is reserved for specific Network Names defined by the OP3FT. These terms cannot be registered as Site Names.

This part groups lists of terms corresponding to Public Frogans Networks (section 5.a) and Internal Frogans Networks (section 5.b).

### 5.a. PUBLIC FROGANS NETWORKS

The following list contains the terms which are used as Network Names to create Public Frogans Networks.

Each Public Frogans Network is intended for the registration of Frogans Addresses corresponding to a given linguistic category.

The list comprises the FROGANS name, which is used for the languages of the Latin writing system, corresponding to the LC-Latin linguistic category, as well as the transcriptions of the FROGANS name into other writing systems or other languages, corresponding to the other available linguistic categories.

- FROGANS  
<LC-Latin> {U+0046, U+0052, U+004F, U+0047, U+0041, U+004E, U+0053}
- 福更斯  
<LC-Chinese> {U+798F, U+66F4, U+65AF}
- フロガンズ  
<LC-Japanese> {U+30D5, U+30ED, U+30AC, U+30F3, U+30BA}
- 프로강스  
<LC-Korean> {U+D504, U+B85C, U+AC15, U+C2A4}
- فروجنز  
<LC-Arabic> {U+0641, U+0631, U+0648, U+062C, U+0646, U+0632}
- ФРОГАНС  
<LC-Cyrillic> {U+0424, U+0420, U+041E, U+0413, U+0410, U+041D, U+0421}
- פרוגאנס  
<LC-Hebrew> {U+05E4, U+05E8, U+05D5, U+05D2, U+05E0, U+05E1 }
- फ्रॉगेन्स  
<LC-Devanagari> {U+092B, U+093C, U+094D, U+0930, U+0949, U+0917, U+0947, U+0928, U+094D, U+0938 }
- ฟรอกแกนส์  
<LC-Thai> {U+0E1F, U+0E23, U+0E2D, U+0E01, U+0E41, U+0E01, U+0E19, U+0E2A, U+0E4C }
- ΦΡΟΓΚΑΝΣ  
<LC-Greek> {U+03A6, U+03A1, U+038C, U+0393, U+039A, U+0391, U+039D, U+03A3}

This list is not exhaustive. It will be updated when new linguistic categories are available.

In order to ensure the stability of the Frogans technology, the OP3FT does not authorize the registration, as a Network Name or as a Site Name, of any transcription of the FROGANS name in any writing system or language.

## 5.b. INTERNAL FROGANS NETWORKS

The following list contains the terms which are used as Network Names to create Internal Frogans Networks.

These terms permit the creation of Internal Frogans Networks which can contain Frogans Addresses corresponding to a given linguistic category.

The list comprises the word INTRANET, which is used for the languages of the Latin writing system, corresponding to the LC-Latin linguistic category, as well as translations or equivalents of the word INTRANET in other languages, corresponding to the other available linguistic categories.

- INTRANET  
<LC-Latin> {U+0049, U+004E, U+0054, U+0052, U+0041, U+004E, U+0045, U+0054}

This list is not exhaustive. It will be updated when new linguistic categories are available.

In order to ensure the stability of the Frogans technology, the OP3FT does not authorize the registration, as a Network Name or as a Site Name, of any translation of the word INTRANET in another language, nor any equivalent term or term which may be confusingly similar with the word INTRANET.

## 6. UNAUTHORIZED NETWORK NAMES AND SITE NAMES

This part contains the terms which are not authorized for registration as Network Names or as Site Names.

These terms are not authorized for registration in order to mitigate the risk of confusion, by Internet users, between the Frogans technology and other Internet technologies, in particular as regards the addressing system specific to Frogans Sites.

This part groups lists of terms corresponding to generic terms used in the Frogans technology (section 6.a), historical top-level domains (section 6.b), technical terms used in URLs (section 6.c), other technical terms of the Internet (section 6.d).

### 6.a. GENERIC TERMS USED IN THE FROGANS TECHNOLOGY

The following list contains generic terms used in the Frogans technology.

The registration of these terms is not authorized in order to mitigate the risk of confusion which could occur in the event of usage of generic terms with a direct connection to the Frogans technology.

- OPERATOR

<LC-Latin> {U+004F, U+0050, U+0045, U+0052, U+0041, U+0054, U+004F, U+0052}

- ADDRESS

<LC-Latin> {U+0041, U+0044, U+0044, U+0052, U+0045, U+0053, U+0053}

- NETWORK

## 6.b. HISTORICAL TOP-LEVEL DOMAINS

The following list contains the terms corresponding to historical top-level domains.

The registration of these terms is not authorized in order to mitigate the risk of confusion between a Frogans Address and a traditional domain name.

These top-level domains (TLDs) are defined in the document "Domain Name System Structure and Delegation", RFC 1591, March 1994, by J. Postel.

- COM  
<LC-Latin> {U+0043, U+004F, U+004D}
- EDU  
<LC-Latin> {U+0045, U+0044, U+0055}
- NET  
<LC-Latin> {U+004E, U+0045, U+0054}
- ORG  
<LC-Latin> {U+004F, U+0052, U+0047}
- INT  
<LC-Latin> {U+0049, U+004E, U+0054}
- GOV  
<LC-Latin> {U+0047, U+004F, U+0056}
- MIL  
<LC-Latin> {U+004D, U+0049, U+004C}

This list does not contain TLDs created after the historical TLDs or in the process of being created as part of ICANN's new gTLDs program.

## 6.c. TECHNICAL TERMS USED IN URLS

The following list contains technical terms used in URLs (Uniform Resource Locators).

The registration of these terms is not authorized in order to mitigate the risk of confusion between a Frogans Address and a URL used on the Web.

- HTTP  
<LC-Latin> {U+0048, U+0054, U+0054, U+0050}
- HTTPS  
<LC-Latin> {U+0048, U+0054, U+0054, U+0050, U+0053}
- WWW  
<LC-Latin> {U+0057, U+0057, U+0057}

## 6.d. OTHER TECHNICAL TERMS OF THE INTERNET

The following list contains other technical terms of the Internet.

The registration of these terms is not authorized in order to mitigate the risk of confusion between the Frogans technology and other technologies of the Internet.

- EMAIL

## 7. NETWORK NAMES AND SITE NAMES WHICH HAVE BEEN THE SUBJECT OF A COURT DECISION

This part covers the terms which have been the subject of a court decision, with the effect of restricting their registration or their usage as Network Names or as Site Names.

The court decisions concerned are those applicable to the OP3FT or to the FCR Operator. For more information regarding the enforcement, by the OP3FT or the FCR Operator, of court decisions, see the Frogans Technology User Policy published on the official Web site of the Frogans technology at the following permanent URL: <https://www.frogans.org/en/resources/ftup/access.html>.

This part groups lists of terms, given according to the subject of the decisions. Each term gives the exact references of the court decision and a link to a public resource with the operative part of the decision and the statement of reasons.

On the date of publication of this document, no term has been the subject of a court decision as a Network Name or as a Site Name.
